

Curriculum:

Progression in Computing

INTENT – The Computing Curriculum

We understand that giving children a secure understanding of the computing curriculum, including e-safety, will be paramount to their success in later life as technology continues to advance and become a larger part of everyone's life. We strive for our children to leave our school as digitally literate citizens with an excellent understanding of computer science and information technology. They will also be aware of how to use technology safely as part of their everyday lives.

Our whole curriculum is shaped by our school vision which aims to enable all children, regardless of background, ability, additional needs, to flourish to become the very best version of themselves they can possibly be. We teach the National Curriculum, supported by a clear skills and knowledge progression. This ensures that skills and knowledge are built on year by year and sequenced appropriately to maximise learning for all children. Although 'technology' is no longer a stand-alone part of the EYFS curriculum we are committed to ensuring technology is available within provision and to contributing to children's understanding of e-safety from the earliest age.

Through our curriculum we aim to inspire a lifelong love of play, design, code and invention with technology.

IMPLEMENTATION - Progression in Computing

	Reception	Year 1	Year 2	LKS2 A	LKS2B	UKS2A	UKS2 B
Computer Science - Computational Thinking	<p>The children learn:</p> <p>that an algorithm is a list of instructions that solves a problem.</p> <p>to sequence a series of events and explain the importance of sequencing.</p>	<p>The children learn:</p> <p>to explore algorithms and sequencing of instructions.</p> <p>to read, follow and create a simple sequence algorithm.</p> <p>to give these instructions so that they can be executed by a robot with the aim of successfully reaching a destination.</p>	<p>The children learn:</p> <p>about writing algorithms that can be turned into programs.</p> <p>to implement their algorithm as a program on a digital device or programmable toy/ robot.</p>	<p>The children learn:</p> <p>to create a detailed flow diagram using the correct symbols.</p> <p>to turn an algorithm into a simple program on a digital device.</p> <p>about testing the program and recognising when it needs to be debugged.</p>	<p>The children learn:</p> <p>to design a simple algorithm to show a real- life situation.</p> <p>about the valuable skills of abstraction and decomposition when tackling more complex problems.</p>	<p>The children learn:</p> <p>to explore problem solving and decomposition.</p> <p>to independently plan, write and test their algorithms and create more complex programs, debugging as needed.</p> <p>about controlling / simulating physical systems and using sensors with multiple outcomes.</p>	<p>The children learn:</p> <p>to create complex algorithms and turn their designs into a program (incorporating variables, procedures and different forms of input and output).</p>
Computer Science - Coding	<p>The children learn:</p> <p>to experiment controlling a range of 'toys' using remote controls and do this with purpose and direction.</p>	<p>The children learn:</p> <p>to create a simple program and correct mistakes (debug).</p>	<p>The children learn:</p> <p>to independently identify and fix a 'bug' in multiple programs.</p> <p>to create a simple program that includes a repeat x times loop.</p> <p>the difference between inputs and outputs.</p>	<p>The children learn:</p> <p>to create their own sprite in Scratch/ Scratch Jr.</p> <p>about sequencing commands and adding a repeat command in a program.</p> <p>how to refine/ improve a program by using the repeat command.</p> <p>how to create a variable.</p> <p>to create a program that contains selection, inputs and outputs.</p>	<p>The children learn:</p> <p>about the structure of a program and learn to plan in logical, achievable steps.</p> <p>to write a complex program, incorporating features such as selection, inputs, repetition, variables and procedures.</p> <p>attempt to debug their own programs and corrects/ debugs errors in code.</p>	<p>The children learn:</p> <p>to create their own complex game within Scratch or other block based coding app that uses variables, event handling, selection ("If" and "Then"), procedures and repetition (loops) to increase programming possibilities.</p>	<p>The children learn:</p> <p>about complex programs and are encouraged to persevere when solving difficult problems even if the solution is not obvious.</p> <p>about executing and adapting common commands using a text-based language e.g. Python/ Javascript/ SwiftPlayground.</p>
Computer Science - Logical Reasoning	<p>The children learn:</p> <p>through play about action/reaction and will be asked "what do you think will happen?" when using technology</p>	<p>The children learn:</p> <p>about making predictions when using technology. E.g. They will be asked to predict what will happen for a short sequence of instructions in a program.</p>	<p>The children learn:</p> <p>to offer accurate predictions of programs and then create their own simple program to check if they were correct.</p>	<p>The children learn:</p> <p>about using logical reasoning to detect potential problems in an algorithm or program which could result in something going wrong</p>	<p>The children learn:</p> <p>to recognise an error in an existing program and attempt to debug/ fix the program.</p>	<p>The children learn:</p> <p>to explore logical reasoning in greater depth and learn to give wellthought-through explanations of any errors they identify in</p>	<p>The children learn:</p> <p>to independently use logical reasoning to detect and correct errors in an algorithm and program.</p>

	or attempting to solve a problem.			and then offer ideas of what is needed to fix/ debug it.	to investigate existing programs, evaluating them and consider how they could be improved.	program code (using the correct terminology).	that there is often more than one way to solve a problem in an algorithm or program.
Computer Science - Networking	The children learn: how to access the web on a classroom device.	The children learn: about signing into a device or online platform.	The children learn: multiple services use the internet e.g. email, web and streaming.	The children learn: the World Wide Web is only one part of the Internet, the part that contains websites. to send an email and understands how this works. how information travels through computer networks.	The children learn: about the key services that can be used to communicate on the internet. to recognise the main components (hardware) which allow computers to join and form a network.	The children learn: about software, hardware and types of connected computers. about how data travels via the internet including binary. more about the different parts of the Internet and services. to create a basic web page using HTML.	The children learn: in more detail about how information/data is transported on the Internet and between computers using packets and IP addresses. about the opportunities computer networks and the internet offer for communication and collaboration.
Computer Science - Online	The children learn: to type keywords in a search engine (Google).	The children learn: how they can use a search engine to find answers and different types of media e.g. videos.	The children learn: the basic skills of searching and navigating the results in a search engine.	The children learn: about key words. that search engines try to put the most useful websites at the top.	The children learn: that search engines use algorithms to sort websites.	The children learn: key skills for using a search engine. about the settings that can alter your search results.	The children learn: to explore advanced features within search engines and learn to use them effectively. how search results are selected and ranked by algorithms.

IT – Harnessing Technology	<p>The children learn: how various devices and apps can be used in the classroom.</p> <p>to independently choose an application for a particular purpose. E.g drawing a picture.</p>	<p>The children learn: to create different types of digital content (short video, ebook or presentation).</p> <p>to combine text and images in a document that showcases learning or tells a story.</p> <p>to use technology to collect, sort and display information that could include data, photos, video or sound.</p> <p>about saving work in a special place and retrieve it again.</p>	<p>The children learn: to create a presentation or basic digital book that is well designed, contains formatted text, images and presents information.</p> <p>to read a simple database to find information.</p> <p>about organising the data they collect.</p> <p>they can create digital content using more than one app or piece of software.</p> <p>to independently save and open files on the device they use.</p>	<p>The children learn: to create digital content using a range of mixed tools/media and how to improve its design.</p> <p>to be creative and independent while using unfamiliar apps or technology to create content.</p> <p>to create a plan/ storyboard when producing digital content.</p> <p>to design a simple questionnaire to collect information, and display the information in a graph or table.</p>	<p>The children learn: to produce documents, media and presentations with increasing independence and competency that present data/ information.</p> <p>to use a keyboard confidently and make use of tools such as a spellchecker.</p> <p>about new forms of technology E.g. AR, Virtual Reality, Wearable Technology etc.</p>	<p>The children learn: to produce digital content in a given format e.g. podcasts, videos, AR, virtual reality, 3D, digital music or illustrations.</p> <p>about planning including elements that they may need to source from other services.</p> <p>to build on the skills they have already developed to create content using unfamiliar technology.</p> <p>to use a spreadsheet / database to collect,</p>	<p>The children learn: to create digital storyboards with a complete narrative of the project or investigation.</p> <p>to confidently identify the potential of unfamiliar technology to increase their creativity.</p> <p>to source, store and combine copyright free images from the internet.</p> <p>to independently select, use and combine the appropriate technology/app tools to create effects that will</p>
-----------------------------------	--	---	--	--	---	--	---

				<p>to add information to a database.</p>		<p>record data and to use simple formulae.</p>	<p>have an impact on others and tell a story.</p>
IT - Online	<p>The children learn: to type keywords in a search engine (Google).</p>	<p>The children learn: how they can use a search engine to find answers and different types of media category e.g. images, book, videos.</p>	<p>The children learn: the basic skills of searching and navigating the results in a search engine to answer questions.</p>	<p>The children learn: that the top search results can be manipulated and are based on things like most popular, recently updated.</p> <p>about filtering results by adding more detail or using advanced tools.</p> <p>to use search engines to collect information.</p>	<p>The children learn: to search for and use information from a range of sources.</p> <p>about making notes from information found on websites to present their findings.</p> <p>that not all sources of information including websites are accurate and can check information using a different sites.</p>	<p>The children learn: to use complex searches and advanced tools to find, select and use information.</p> <p>check the reliability of information on the internet.</p>	<p>The children learn: to use complex searches, filters and advanced tools to find, select and use information</p>

Digital Literacy – Technology in the Real World	<p>The children learn: to recognise and discuss common uses of information technology in school and outside of school.</p>	<p>The children learn: about the uses and purpose of technology in the classroom, at home, work and the world around them. about some of the common ways in which technology at home can be used.</p>	<p>The children learn: about the numerous methods of online communication and how it is used in the world around them. to explore their own use of the internet and why it is important to stick to the rules.</p>	<p>The children learn: that the internet is a computer network. that the internet can provide multiple services, such as the world wide web, streaming music/ video and email. explore a web sites journey from first request to appearing on the screen. to learn advanced web terminology e.g. URL.</p>	<p>The children learn: to differentiate between apps that use the Internet, the school network or that are self contained on a device. to use computing to communicate and collaborate. about documents and methods of collaboration over the internet e.g. blog.</p>	<p>The children learn: about different online communication tools/apps and how they could be used for different purposes e.g. work and social. about working in a group using collaborative tools.</p>	<p>The children learn: about digital crimes and threats that might exist online. E.g. worms, trojans, viruses, spyware, ransomware and malware. about anti-virus software and how they can help protect devices from infection. advanced web terminology e.g. firewall, security updates, pop up blocker, scams, phishing, HTTPs, location based settings, in app purchasing, trolling, filtering etc.</p>
Digital Literacy – Media & Content -	<p>The children learn: that there are many different types of media content including; sound, images, books, podcasts/ audiobooks and video via the web.</p>	<p>The children learn: to access different types of media content on their device. Including; sound, images, books, podcasts/ audiobooks and video via the web.</p>	<p>The children learn: where different types of media content can be found online. Including; sound, images, books, podcasts/ audiobooks and video via the web.</p>	<p>The children learn: how to make judgements about the usefulness and accuracy of information. about the term ‘fake news’. about what copyright is and why we have copyright laws.</p>	<p>The children learn: more about what Fake News is, it's purpose and that Fake News can be found on all media. how to identify Fake News. that data can be manipulated to make Fake News appear to be true.</p>	<p>The children learn: about how and why information found on some sites will be biased. how to source copyright free materials to use in their digital projects. how to credit the use of websites in their work</p>	<p>The children learn: to explore in more depth the legal and moral reasons not to plagiarise or infringe copyright and the impact it can have on the creator of the content.</p>

				<p>to recognise copyright material.</p>		<p>and why this should be done.</p>	
--	--	--	--	---	--	-------------------------------------	--

<p>Digital Literacy – Online Safety</p>	<p>The children learn: the Internet can be used to communicate with others. simple online safety rules. people create online content such as video and websites.</p>	<p>The children learn: how to access and search the web. to identify people they can trust and who they can ask for help when using the internet. to send a digital message. how they should behave and interact with others in the online world. why it is very important not to over share, share things that are personal or may hurt other people. the ways that some people can be unkind online. about following sensible online rules. safe behaviours in their day to day world such as not talking to or meeting strangers and how this applies in the online world. what a username and password is and that they must keep them private. that online content such as video, images, websites and games are created and shared by people. that to use other peoples work without asking or giving credit is wrong.</p>	<p>The children learn: about safe and unsuitable sites/apps. e.g. PEGI rating. to talk to a trusted adult before sharing personal information online and using strong passwords. that the characters and people they interact with may be computer generated / including games. the differences between the Internet and the physical world. sending a message and why it is important to communicate in a polite manner. that login details and passwords should only be shared with trusted adults. that copyright is something that prevents people stealing other people’s work (content). what personal information is and that they need to talk to a trusted adult before sharing online. how some information may be inaccurate or untrue. to independently use a search engine, navigate a website, use favourites, bookmarks or typing the URL. that you can be connected to many</p>	<p>The children learn: the SMART rules about using the internet safely and responsibly. what personal information is and what they shouldn’t be sharing. they should pause before posting and consider the potential consequences. who they should seek help from about online concerns. the correct and sensible choice when presented with hypothetical scenarios. how to send and reply to online messages, such as email, respectfully and understand the difference between online and face-toface. how to use the safety features of websites as well as reporting concerns to an adult they trust. what online bullying/ cyberbullying is and some of the forms it can take. how to report any concerns and who they consider a trusted adult. they need to have a balanced approach to their use of technology. to make good choices about how long they spend online.</p>	<p>The children learn: the potential risks and ways they can protect themselves and friends from harm online. the safety features of websites and apps. e.g. block or report. they should report concerns to a trusted adult. the Internet is a great place to develop rewarding relationships. not to reveal private information to a person they know only online. that friends/followers profiles may not reflect the truth about their real lives. the term ‘digital footprint’ and that the information they put online leaves a digital footprint or “trail” which can be positive and negative. to search for their own name and usernames in Google to test their digital footprint. how they should act appropriately & respectfully online. how to deal with online bullying. how photos can be altered digitally and the creative upsides of photo alteration, as well as its power to</p>	<p>The children learn: to demonstrate and explain the importance of communicating kindly and respectfully. about the negative online behaviours such as bullying, trolling, grieving and harassment. about empathy and the effects of online bullying. anything they post online can be seen, reshared, re-used and may have a negative effect on others. about the ‘Digital 5 a Day’ plan and that they need to have a balanced approach to their use of technology. what makes a secure username and password. why people set up fake accounts or copy others identities. what an online identity or internet persona is, e.g. social identity in online communities and websites (Facebook, Instagram, YouTube etc) including photos and posts. how to avoid being tricked by scammers online. E.g. Phishing emails. The child can explain why an app may be free but have in-appurchasing and what that is.</p>	<p>The children learn: the advice they should/would give friends about making good choices online. the consequences of making poor online choices. E.g. Online bullying, Inappropriate comments (racially or sexually orientated), uploading inappropriate material (adult / illegal / antisocial), accessing inappropriate sites (anti-social or illegal behaviour / adult content) and breaching copyright laws. the way men and women can be stereotyped in movies and TV. when to seek help from a trusted adult and not to try and deal with online situations on their own. how to block and report inappropriate comments or behaviour online. how to maintain healthy positive relationships with others while online. behaviours and strategies to prevent and stop online bullying. The child knows and can list the websites and agencies they can</p>
--	--	---	---	--	---	---	--

			<p>people in your life (real life and online).</p> <p>to ensure a trusted adult is aware of who they are interacting with online.</p> <p>to explain some of the potential risks when posting something to the internet.</p> <p>that once something is posted others can read the post and share it.</p>	<p>to recognise websites and games appropriate for their age. E.g. PEGI rating.</p> <p>online accounts need to be signed in to and why passwords should never be shared.</p> <p>what makes a secure password and why they are important.</p> <p>how to use a password security checking tool.</p> <p>what represents an online identity E.g. images, username, information shared and digital footprint.</p> <p>to post positive comments online.</p>	<p>distort perceptions of beauty and health.</p> <p>why copyright laws exist and presenting others work as one's own is called plagiarism.</p> <p>to use a copyright free image gallery, or they can change the search criteria.</p> <p>the positive and negative effects technology may have on their health.</p> <p>why they need to ask a trusted adult before downloading files and games from the Internet. E.g. virus.</p> <p>to choose a secure passwords.</p> <p>why using an avatar and online name is advisable.</p>		<p>contact in case they need help.</p> <p>what steps they can take to create a 'positive online image' including defining acceptable and unacceptable online behaviour and the benefits this will have to them now and in the future.</p>
--	--	--	---	---	--	--	---

IMPLEMENTATION – LONG TERM PLAN

YEAR A	Reception	Y1	Y2	Y3 / Y4	Y5 / 6
Autumn 1 Digital Literacy	Technology & Me	Modern Tales	Online Buddies	Online Detectives	Youtuber
Autumn 2 E-Safety	My Online Life	My Online Life	My Online Life	My Online Life (3)	My Online Life (5)
Spring 1 Computer Science	Robots	What is a Computer?	Code a Story	Dancing Robot	STEAM Challenges
Spring 2 Information Tech	Animal Safari	Mini Beasts	Story Life	Rainforests	Making AR Games
Summer 1 Wider World	Pretty Pictures	Animate with Shapes	Heads Up!	Keyboard Adventures	Video Game Music
Summer 2 Wider World	Beats & Rhythms Shape Hunt	Drawing Maths	Maths Madness	T-Shirt Designer	News Reports

YEAR B	Reception	Y1	Y2	Y3 / Y4	Y5 / 6
Autumn 1 Digital Literacy	Technology & Me	Modern Tales	Online Buddies	Fake or Real?	Online Safety Dilemmas
Autumn 2 E-Safety	My Online Life	My Online Life	My Online Life	My Online Life (4)	My Online Life (6)
Spring 1 Computer Science	Robots	What is a Computer?	Code a Story	Hour of Code	VR Worlds

Spring 2 Information Tech	Animal Safari	Mini Beasts	Story Life	Dinosaurs	Crossy Roads
Summer 1 Wider World	Pretty Pictures	Animate with Shapes	Heads Up!	Wizard School	Solve IT Club
Summer 2 Wider World	Beats & Rhythms Shape Hunt	Drawing Maths	Maths Madness	Minecraft Challenge	Quiz Show Host

IMPLEMENTATION – STICKY KNOWLEDGE / ENDPOINTS

	Reception	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Sticky Knowledge / End Points	<p>Know how to type their first name</p> <p>Know how to switch a computer on and off</p> <p>Know that their password is private</p> <p>Know how to take a photograph using an iPad / tablet.</p>	<p>Know how to logon to a device using a username and password.</p> <p>Know not to share personal information.</p> <p>Know how to access the internet / apps.</p> <p>Know how to print my work from a device.</p>	<p>Know how to save a document into their folder.</p> <p>Explain the SMART code for e-safety.</p> <p>Know how to complete a simple search.</p> <p>Know how to copy and paste.</p>	<p>Know how to position fingers on a keyboard.</p> <p>Know how to search for websites, videos, images safely.</p> <p>Know what to do if they are concerned about something online.</p> <p>Know how to change the font, style and size.</p>	<p>Explain how search results are organised.</p> <p>Know how to format images to allow them to be moved.</p> <p>Know what is meant by a 'digital footprint'</p> <p>Know how to create an effective Powerpoint presentation – using knowledge of text, copy / paste and image control.</p>	<p>Know how to use a keyboard increasingly effectively.</p> <p>Know how to search safely and effectively.</p> <p>Know age appropriate apps.</p> <p>Know how to enter data into a spreadsheet.</p>	<p>Know how to generate and use a QR code which link work / websites.</p> <p>Know the consequences of making poor online choices.</p> <p>Know how to use a simple formula within a spreadsheet.</p> <p>Know how to insert a hyperlink to direct to a presentation or app.</p>

IMPLEMENTATION - Rationale

Our Computing curriculum is carefully designed to be progressive over time. Its structure allows the whole school to work progressively on areas of the curriculum at the same time. For example, each year group begins the year by further developing their understanding of digital literacy. In the second half term, pupils understanding of digital literacy is furthered through ‘My Online Life’ – a series of lessons, which the children study throughout the school, and progresses their understanding of e-safety and how to keep safe online. Later in the year, the children look in-depth at Computer Science and Information Technology through thematic units where the learning builds year-on-year. Finally, in the second half term of summer the children work on all of their computing skills gained over the year on various projects. The timing of these allows the children to reason with their understanding and master their skills.

In addition to the core curriculum offer technology is a key part of every child’s life in school. In order to deliver Computing lessons effectively, laptops and iPads are used within the classroom allowing children to practise skills in a range of contexts. We add to this offer with other forms of technology – for example programming technology and other hardware specific to the skills which children need to develop.

Although studying e-safety specifically for a number of weeks, links are made with online safety through other curriculum areas including PSHE and assemblies. We whole-heartedly believe that children must see the importance of online safety at all times in the year, not just during weeks where it is studied in class.

Links are made regularly with other national curriculum subjects; however, children have a designated Computing lesson each week as we are determined not to water down the important skills children must know.

In order to support pupils, staff and parents in the safe use of technology the school uses an E-Safety / Acceptable Use Policy which is updated annually. Our ‘Golden Rules’ of Be Kind, Be Safe, Be Driven are equally applicable to technology.

IMPACT

The effect to which our Computing curriculum is successful is measured by the extent to which children live out our intent for the subject 'with a lifelong love of technology'. Children will have developed skills which enable them to be creative in their use of technology and understand how to stay safe online.

Our Computing work is celebrated and assessed for impact through:

1. Use of the school assessment tracker
2. Whole school displays
3. Pupil questionnaires
4. Whole school themed weeks/days
5. Governor and staff monitoring
